Paul R. Drury

Application No.: 10/564,969

Confirmation No.: 5387

Filed: August 25, 2006

Art Unit: 3729

For: Method of Manufacturing a Component for
Droplet Deposition Apparatus

Examiner: D. P. Angwin

APPLICANT'S INTERVIEW SUMMARY

MS Amendment
Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

Dear Sir:

Applicant's undersigned representative appreciates the courtesy extended by the Examiner during the telephonic interview of March 22, 2011. Applicant's representative indicated that, in claim 11, the language "comprising a plate having at least one nozzle plate layer and a plurality of nozzles, each nozzle extending through polymeric material located within a respective aperture within the nozzle plate" was not addressed in the Office action of December 2, 2010. It was suggested that to be considered as a basis for distinguishing over the prior art, the language should be moved to the main body of the claim, rather than the preamble.

As indicated in the Examiner's Interview Summary of March 28, 2011, the Applicant's remarks of March 26, 2010 (which remarks are incorporated herein by reference for the absence of any potential doubt as to inclusion of the March 26, 2010 in the record of the present application), were also discussed.

Application No.: 10/564,969

Docket No.: 27754/26717

Dated: June 2, 2011

Respectfully submitted,

/Jeremy R. Kriegel, Reg. No. 39,257/
